What is Progress Zones Map?

Progress Zones-Emergency Contacts Map is a digital interactive online map to view information about current Engineering construction areas around the City Duluth. Mapped locations only represent general areas and do not show whether a street is open or closed. Use the map to click on the “barricade” icons to view pop-up windows of each engineering project’s description. Users can pan, zoom in/out, identify features, print, toggle on/off layers. It requires Adobe Flash Player and can be accessed anywhere on a computer or android mobile phone or tablet inside or outside the City of Duluth network with an internet connection.

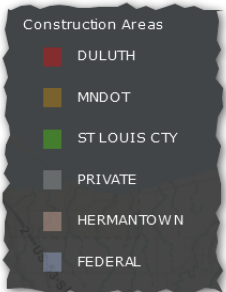

If you note errors on the map, please contact the Engineering Front Office (218-730-5200) of GIS Office (218-730-5082 or ksundeen@duluthmn.gov) to inform them.

What Layers are Displayed?

whether any access or detour details are available, project contact name, phone number, and email, type of project, jurisdiction of construction, and any additional links to the projects public document, images, detour maps, or jurisdiction URLs.

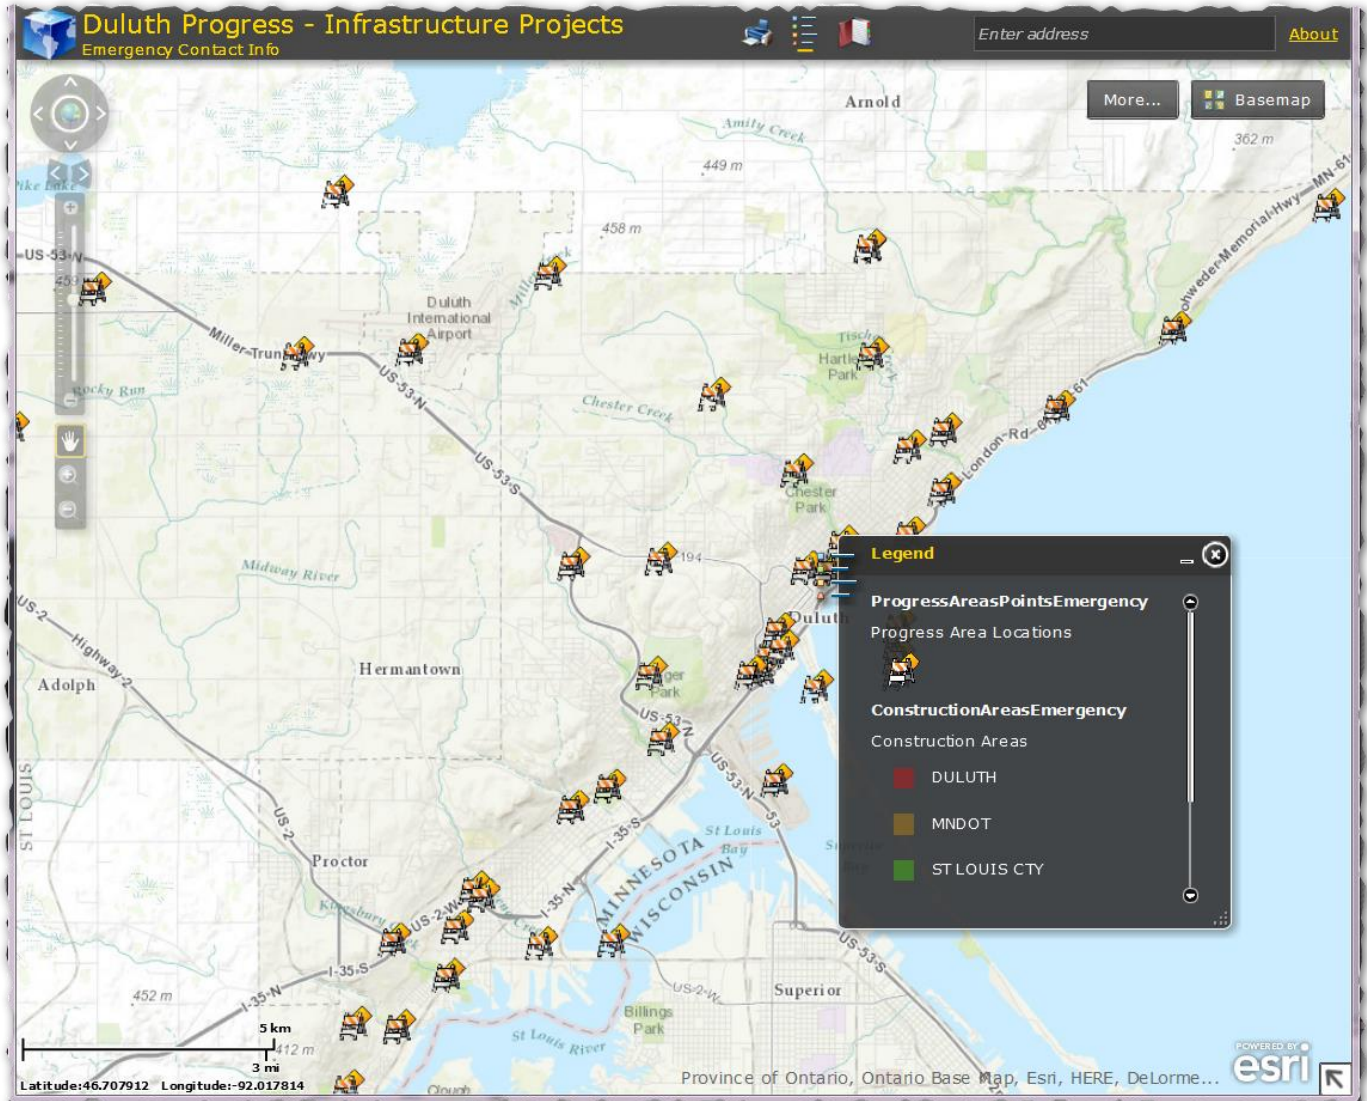

Construction Areas Points: General Engineering Division construction area shape showing the area likely to be affected by construction. Colors represent jurisdiction of projects.
